New Fashion Yarn from Caron®

NEW! Simply Soft® Shadows

One of the most "must-have" yarns requested by so many of our designers has been Simply Soft Shadows. It's not just your everyday self-striping yarn, but it's more subtle and with the super-soft hand of Simply Soft you love. It's comprised of 3-plys of a Simply Soft solid and one of a strong self-striping. Result? A very subtle but pronounced soft striping.

But one of the best things about Shadows is how it coordinates with the existing Simply Soft colors. There are 8 Shadows colors, each with a coordinating Simply Soft solid.

Notes from Cari

One of the coolest features about Shadows is the subtle self-striping effect. Look for patterns that show off this effect. Try knitting or crocheting a modular piece (purse, scarf, wrap, throw, etc.) using Shadows. The self-striping, as it "turns the corner" of the module, gives a very distinguished pattern – one that cannot be easier to do!

Cari Clement
Director of Fashion & Design

In the next issue of Caron Connections, we'll show you even more exciting yarns. Or, you can [visit our website](#) and take a look.

Happy stitching,

Cari Clement
